

CS 230, Quiz 2

Solutions

There is one question. No books, notes, or other aids are permitted.

In the raytracing problems below, **green** objects are wood, **red** objects are reflective, and **blue** objects are transparent. The scenes are in 2D with a 1D image. **yellow** circles are point lights; the ray tracer supports shadows. Draw all of the rays that would be cast while raytracing each scene. Use a maximum recursion depth of 3. (Don't worry about precisely what counts as depth 3; I just care that recursion is being performed correctly when necessary and that important rays are not missing. There are no more than 20 rays in the "exact" solution.)

Problem 1 (4 points)
